PROFESSIONAL SUMMARY

Full-stack developer with hands-on internship experience across the MERN stack, TypeScript, Supabase, Flutter, and ASP.NET Blazor. Proven track record delivering live, production-ready client applications with REST API integration, SQL/NoSQL database design, responsive UI development, and Agile collaboration. BS Computer Science candidate at Air University, Islamabad, building further expertise in DevOps and AI/ML.

EDUCATION

BS Computer Science <i>Air University, Islamabad</i>	2025 – Present
Associate Degree in Computer Science (ADCS) <i>Air University, Islamabad</i>	2023 – 2025
FSC Pre-Engineering <i>Punjab Group of Colleges (Federal)</i>	2020 – 2022

EXPERIENCE

TechXServe Enterprise <i>Development Intern Track-to-Hire</i>	July 2026 – Present <i>Islamabad, Pakistan</i>
- Engineered full-stack features for 2+ live client projects using the MERN stack, TypeScript, and Supabase, driving end-to-end delivery from API design through production deployment. - Built REST API integrations and CRUD operations, enabling real-time data management across client-facing applications. - Collaborated within an Agile team environment, consistently delivering production-ready code that met client specifications.	
CNS Software House <i>Full Stack Developer Intern</i>	June 2025 – September 2025 <i>I-10, Islamabad</i>
- Developed and deployed frontend and backend modules across 3+ full-stack web projects, delivering client-ready features within a 3-month internship. - Integrated responsive UI components with RESTful APIs using JavaScript, improving application usability and cross-browser performance.	
WEGO – Smart Transportation System Final Year Project (ADCS) <i>Cross-Platform App Developer</i>	2025
- Designed and built two cross-platform applications — a Flutter Android app and an ASP.NET Blazor admin dashboard — featuring real-time data sync and role-based authentication. - Streamlined mobile-to-web integration, automating real-time scheduling to reduce manual transport coordination.	

PROJECTS

Islamabad Ambulance Service <i>React.js • TypeScript • Tailwind CSS [Live]</i>	Mar 2026
- Developed a production-ready emergency service platform with a fully responsive UI; deployed live and indexed on Google Search. - Built reusable React and TypeScript components styled with Tailwind CSS, ensuring cross-device compatibility and fast load performance.	
Islamabad Rent Cars <i>React.js • TypeScript • Tailwind CSS [Live]</i>	Jan 2026
Built and deployed a live car rental platform with dynamic listings and responsive design, accessible to real users via Google Search.	
Complaint Ticket Management System <i>ASP.NET Blazor • C# • SQL Server</i>	2024
Implemented role-based access control, CRUD operations, and real-time ticket tracking through a responsive Blazor UI backed by SQL Server.	
POS System – Noor Collection <i>React.js • SQL</i>	2024
Designed and deployed a point-of-sale system for a live retail business, managing sales transactions and inventory through SQL database integration.	

ACHIEVEMENTS

- Awarded Certificate of Highest SGPA (3.61 / 4.0) in 2nd Semester — Air University, Islamabad.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, C#, C++, SQL, Dart, Python (Basic)
Frameworks & Libraries: React.js, Node.js, Express.js, ASP.NET Blazor, Flutter, Tailwind CSS, Bootstrap
Databases: MongoDB, Supabase (PostgreSQL), SQL Server, Firebase
Tools & Platforms: Git, GitHub, REST APIs, Postman, VS Code, Cursor, Visual Studio, Android Studio
Currently Learning: DevOps Engineering, AI/ML (Python, scikit-learn)
